

## Who we are!

Critical Design Associates Inc. is a technology services firm dedicated to customer success and delivering “best of breed” solutions.

## Our Expertise

We have expert level experience deploying and supporting the following technologies:

## Our Services

### Consulting

CDA delivers consulting services with extensive experience on the following projects:

- Project Based Consulting
- Strategic Planning for IT Infrastructure
- Business Continuity/Disaster Recovery Planning
- Data Center Moves
- IT Process Design
- Cloud Migration Strategies
- DevOps
- DevSecOps
- IT Services & Asset Management
- Cybersecurity

### Managed Services

CDA delivers managed services with the following current offerings. We can develop other managed services using our existing framework to meet customer needs.

- Application Packaging and Delivery
- FINRA 17a-4 Compliance
- DevOps
- Mobile Device Management
- Application Deployment
- Firewall Policy Life Cycle Management (FPLM)
- Endpoint Management
- Patch Management

### Staffing

CDA staffing is a bit different from the conventional approach to staffing. We meet with the customer to review their existing needs and build the resources required to meet the staffing need. We recruit, develop, train, and deliver the new team member will all of the skills needed. The candidate is presented to the customer using an interactive demonstration of the skills they have to not only claim, but to prove

they have the skills to do the job precisely. Candidates are not only developed from a technical perspective but also a professional perspective to communicate, document, and deliver on-time.

- Citrix and Application Delivery
